

Calcium Hardness Increaser (Calcium Chloride)

If the Calcium Hardness is too low it can lead to corrosion of the pool equipment and etching of plaster, and if too high it can lead to scaling and cloudy water.

Appearance and Properties

Appearance	White to off-white pellets
Odor	Odorless
Chemical family	Inorganic salts

Directions for Use

For Best Results:

- Measure the calcium hardness in your pool water
- If calcium hardness is below 200 ppm use the charts shown to determine the correct amount of this product to use.
- Add this product to the deep end of the pool.

POOL VOLUME IN GALLONS	50 PPM	100 PPM	200 PPM
5,000	3 lb.	6 lb.	13 lb.
10,000	6 lb.	13 lb.	25 lb.
20,000	13 lb.	25 lb.	50 lb.
30,000	19 lb.	38 lb.	75 lb.

Availability

25 pound Plastic Pail
4 pound Plastic Pail (8 Pack)
