

Yellow Algae Remover (Sodium Bromide)

Appearance and Properties

Appearance	White, crystalline solid
Odor	Odorless
Chemical name	Sodium bromide

Directions for Use

To remove visible yellow or mustard algae: (All dosages are for 10,000 gallons of water).

1. Brush walls and floor areas affected by yellow algae accumulations.
2. Apply 4 oz. of Yellow Algae Remover per 10,000 gallons as close to the affected areas as possible. For severe accumulations, double the above dosage.
3. Superchlorinate by following directions of that product's label.

Swimming may be resumed a few hours after treatment.

WEEKLY MAINTENANCE TREATMENT:

To prevent accumulation of yellow algae: (All dosages are for 10,000 gallons of water).

1. With water temperature over 80°F, add 4 oz. Yellow Algae Remover with 1 gallon liquid chlorine or 1 pound of a dry chlorine once a week.
2. With water temperature under 80°F, add 2 oz. Yellow Algae Remover weekly and ½ gallon liquid chlorine or ½ pound of a dry chlorine.
