

# pH Increaser (Sodium Carbonate)

The correct pH ensures the Sanitizer (Chlorine) works effectively.

pH is a measure of how acid or alkaline the water is, low pH (acidic) may cause corrosion of metals and eye irritation.

## Appearance and Properties

Appearance	white granules
Odor	Odorless
Chemical name	Sodium carbonate, anhydrous

## Directions for Use

### When pH falls below 7.2:

While the pump is in operation, distribute pH INCREASER into the deep end of the pool. For every 10,000 gallons of water add the following amounts:

- 1 pound when pH is below 6.6.
- $\frac{3}{4}$  pound when pH is between 6.6 and 7.0
- $\frac{1}{2}$  pound when pH is between 7.0 and 7.2

### How to add this product to your pool:

1. Scatter this product over the pool surface.
2. Keep the circulation pump running.
3. Check the pH again after 2 hours.
4. Repeat treatment if necessary.

## Availability

10 pound Plastic Pail (4 Pack)

5 pound Plastic Pail (8 Pack)
